Candidate Conversation Guide

This guide will help you engage meaningfully with candidates when they call you or knock on your door. Ask candidates the questions highlighted in blue, and follow up with the talking points below.

How will you promote affordable homeownership?

Homeownership is key. It's the main way most families build wealth and become financially resilient. Safe and stable housing means children excel in school, workers earn, seniors thrive, and communities prosper.

What steps will you take to increase the supply of affordable homes?

The need for housing is significant and growing. More than 1 in 4 households in Minnesota pays more than they can afford on housing. To meet demand, we need 10,000 new units of affordable housing each year.

What will you do to address racial disparities and expand access to homeownership?

There are grave inequities in homeownership. The transformational benefits of ownership are not accessible to everyone. In Minnesota, 77% of White households own a home, compared to 42% of households of color, and 24% of Black households.

How will you protect homeowners unable to make housing payments, and prevent a wave of foreclosures?

It's important that families who already have affordable housing can stay in their homes. Systems need to be in place to prevent homeowners from falling into foreclosure during this uncertain economic climate.
